

// Unstuck - Wireframe Guidelines - Beta V1.1

The Unstuck foundation platform is designed to serve as the basis for future developments. While the range of features may seem extensive, they combine to create a comprehensive system that enables a variety of services as needed. The platform is divided into two primary components: **Frontend** and **Backend**.

1. Frontend

The frontend is dedicated to all features that standard users will see and interact with. It includes the following:

Corporate Website:

- Up to **10 pages** that provide information about the platform.

Account:

- **Log-in / Register / Reset Password / Forgot Username**
- **Account Security Login:**
 - Two-Factor Authentication (2FA)
 - Email OTP (One-Time Password)
 - Push Notification OTP

E-commerce:

- **Product List:** A list of available products.
- **Single Product Page:** Detailed information for each product.
- **Cart Page:** User's selected items for purchase.
- **Checkout Page:** Complete purchase and payment details.

Crowdfunding/IPO:

- **Project List:** A display of all available projects.
- **Single Project Page:** Detailed information for each project.
- **Back Project Page:** A page to support or invest in a project.
- **Early Access Page:** Exclusive project access for early supporters.
- **Buy Membership Page:** A page where users can purchase membership options.

2. Backend

Account Dashboard:

- A visual **graph** providing an overview of user activity.
- Include an option for users to **download reports** or **export data**.

Account Settings:

- **Profile Information:** Display and edit user details like avatar, email, username, and social media profiles (Facebook, YouTube, Instagram, etc.).
- **Profile Modifications:** Allow users to change email, password, name, Telegram username, country, and address. Include options for **emergency alerts** via Telegram, Email, or SMS.
- Add **tooltips** or help text for specific fields (e.g., password change requirements).

Membership:

- **Daily Farming:** Visualize earned points and rewards.
- **Reports:** View progress and performance reports.
- **Buddy Referral Link:** Share referral links.
- **Daily Tasks & Leaderboard:** Track daily tasks and compare with others.
- **Membership Settings:** Customize membership options and settings.
- **Statistics & Billing:** View usage statistics and billing history.

Membership Marketplace:

- Spend points to purchase items, transfer points to other users, or buy memberships.

Badges:

- **Owned Badges:** Display badges already earned.
- **Full Badge List:** Show all available badges and tasks needed to unlock them.

Wallet:

- View **multi-currency funds** with options to **deposit, withdraw,** and **transfer** funds. Includes transaction history.

E-commerce:

- Display a list of **purchased products and services**, along with **invoices**, payment history, shipping addresses, and return options.

Financial Services:

- **Assets List:** View all user assets.
- **Single Asset Page:** Detailed view of each asset.
- Ability to **deposit** or **withdraw** into assets, view **assets under management**, and track **ROI** and reports.

Financial Services E-commerce:

- Users can **sell assets** to others. Includes product pages with **buy/sell options**, current **bid/ask prices**, and transaction reports.

KYC (Know Your Customer):

- Guide users through the **KYC/AML** process.
- Provide a **user status report** based on KYC compliance.

3. Backend Management

Users:

- **View All Users:** Display a list of all platform users.
- **Single User View:** Access detailed profiles and modify user settings.
- **Bulk Modify:** Adjust settings for multiple users at once.
- **User Reports & Statistics:** View user activity and performance reports.

E-commerce Management:

- **View All Products:** Display and modify products.
- **E-commerce Settings:** Manage settings and access **reports & statistics**.

Financial Services Management:

- **View All Services:** Display and modify financial services.
- **Reports & Statistics:** Access service-related data and performance metrics.

Wallet Management:

- **View All Wallets:** Display all user wallets.
- **Transaction Management:** Track and manage transaction flows.
- **Manual Approval:** Approve pending transactions manually.
- **Reports & Logs:** Access detailed reports, statistics, and transaction logs.

Badges Management:

- **View All Badges:** Display and modify badges.
- **Settings & Reports:** Manage badge settings and access performance reports.

Membership & Points Management:

- **View Membership Options:** Display all available memberships.
- **Points Management:** Track and modify user points.
- **Reports & Statistics:** Access membership-related reports.

KYC Management:

- **Filter Users:** Sort users by country or approval status.
- **KYC Status:** Edit individual KYC statuses.
- **Pending Approvals:** Manage pending KYC requests.
- **Flagged Users:** Monitor and review flagged users.
- **Reports & Statistics:** Access KYC-related data and reports.

Additional Backend Settings:

- **Security Settings:** Modify platform security configurations.
- **Email Performance Settings:** Manage email notifications and performance.
- **Bank & Wallet API Settings:** Configure payment APIs.
- **Tax Center Settings:** Manage tax-related settings.
- **Theme/Template/Newsletter Settings:** Customize platform appearance and communication templates.
